

Achieved connection geometry • central targets (5-15 mm)

Incoming weights, source-region totals and exact delay bins matched

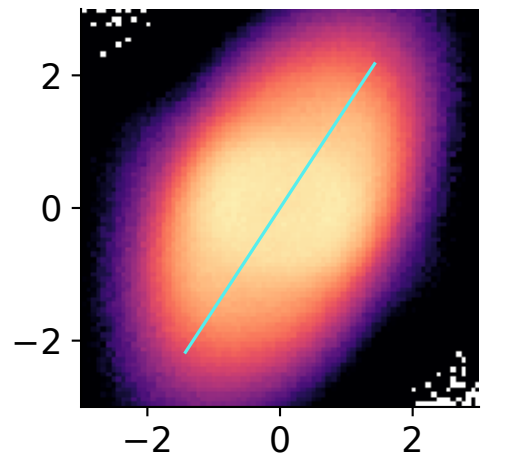

Source - target y (mm)

Current axis
central axis ratio 1.94

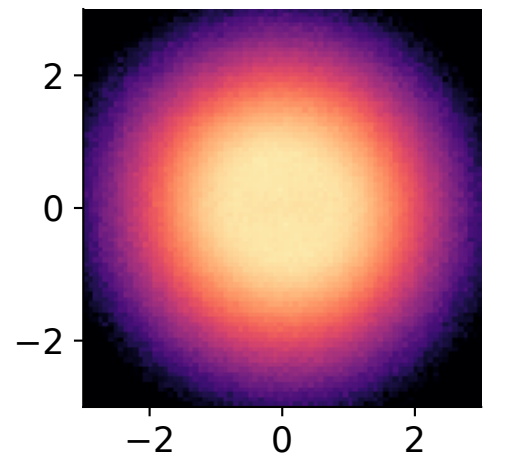

Source - target x (mm)
90°

Rotated partners
central axis ratio 1.58

Source - target x (mm)
90°

Isotropic partners
central axis ratio 1.03

Source - target x (mm)
90°

Fraction of incoming EE weight / bin
