

Topic 4 — state-conditioned spatial susceptibility along the MZ z-depletion trajectory (candidate zA_q50_tz10000; model-side diagnostic, NOT a seizure)

Columns = the resolved pre-onset trajectory; onset (runoff boundary) is unresolved/saturated for all 3 seeds (fail-closed) -> blank endpoint in row 4a. eigenmode (row-4 text) / probe / finite-time response are distinct objects.
