

R1 sensor

31 Pareto / 100 rows
6 locked candidates
long rest gap not bridged

E3 high-init screen

52 survivors
38 saturated-tonic
upper bound, not basin evidence

E4 frozen geometry

2/2 healthy low starts
leave IED state
susceptible low/high do not separate
D1/D2 X loads do not return low

E5 dynamic Z/H/X

NOT_UNLOCKED
no legal frozen geometry
lifecycle not tested

bounded negative: tested H creates a finite branch without susceptibility selectivity
