

Spatial Z/M dynamics under stationary OU input enter a global tonic runaway

frozen E1146 scaffold · full learned $E \rightarrow E/E \rightarrow I$ · one suprathreshold h component · 3/3 confirmation seeds

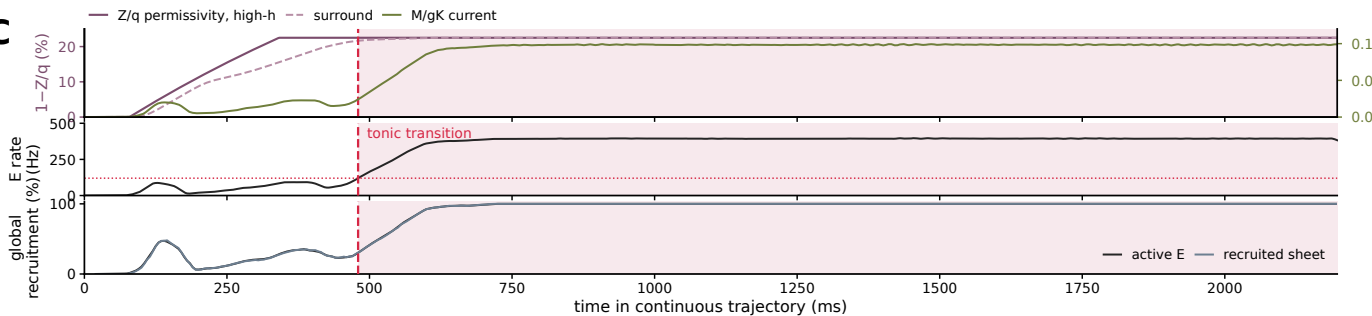

A data-driven substrate

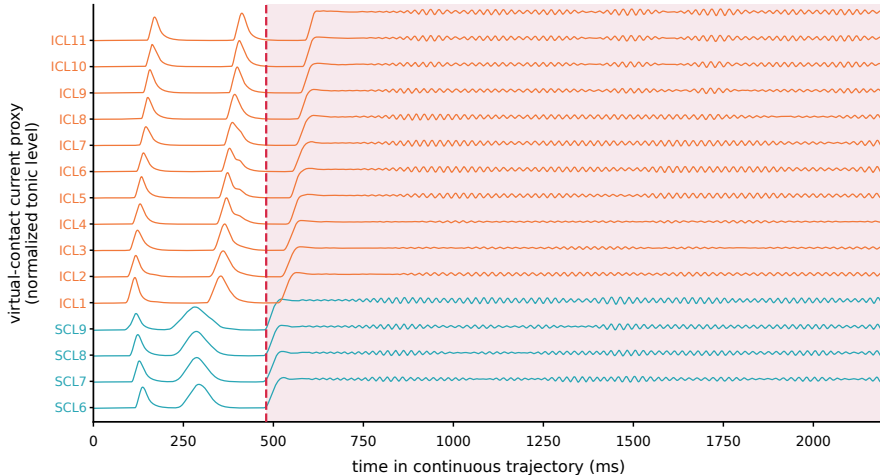

B

C

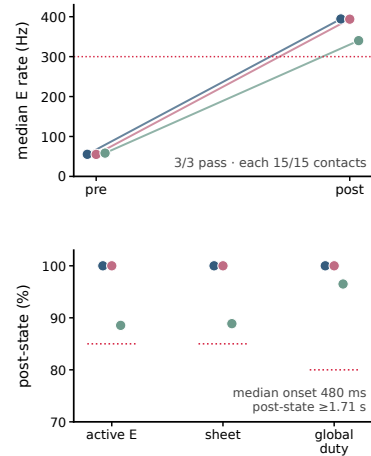

same-state virtual-SEEG readout

D

three-seed confirmation

continuous stochastic drive; no pulse train · Z/q and M/gK only (use_SG=false) · model-state morphology, not clinical seizure reproduction
